

Gilbert Intermediate

How to find out what's for lunch, using your Alexa (Echo)

First say: *"Alexa enable School Menus by Nurtislice"*

When it asks you for your district, university, or organization, say:

"My district is Gilbert Community School"

After it finds the district, it will ask you what school you are interested in. You will say:

"My school is Gilbert Intermediate-", or you can replace Intermediate with any of the other schools.

Lastly, it will allow you to ask:

"What's for lunch?"

Now You're Set-Up -

Say: *"Alexa open School Menu."*

Then say: *"What's for lunch?"* (It will remember the school you selected during set-up)

If you want to know the lunch of a different school than what you have set up, simply say:

"What's for lunch at Gilbert (insert school)?"
